

Mapas de Areas Protegidas Chile-Argentina

Notes:
 This map shows the current IUCN listed protected areas along with the additional protected areas sent by field scientists.

The point locations are due to limited information to show the real limits; most are anyway so small that it does not matter given the scale of the map.

In cases where updated polygons were similar to IUCN polygons, the updated polygons were removed from the map.

The data sources are the World Database of Protected Areas which contain the IUCN listed protected areas with additional protected areas and proposed protected areas contributed by Adrian Schiavini, Pablo Yorio and Ricardo Muza.

	Área proptegida propuesta	Profundidad		0 - 100m
	Área Protegida		100 - 200m	
	Área Protegida		200 - 1000m	
	Límite ecosistema marino		Más de 1000m	
	Ciudad
